

DVD 10 DISC LABEL PRINTING SPECIFICATIONS

Artwork should arrive with the input data. Artwork should be submitted as film, camera-ready artboard, or computer files.

FILM

Maximum of six (6) colors.

Film positive, emulsion side up, right reading, color separated (1 film for each color with the PMS color number noted on each film). Include registration marks on all four sides.

INK COLORS

Any ink color from the Pantone Matching System (PMS) is available.
Please note: light colors do not reproduce well on the metallic disc background.

HALFTONES

No halftones or process printing is allowed on a single layered, double-sided DVD Disc.
